J. J. SPALDING & CO., PRINTERS, CHICAGO.

Remember this Catalogue is a supplementary one to my 96 page book of February, 1879. If you are not in possession of my February Catalogue, please send for it.

Examine carefully my large and nice line of goods, and preserve my Catalogue for future reference.

By giving my personal attention to my business, and dealing fairly with the trade, I hope to merit your patronage.

My aim will be to execute orders correctly and with as little delay as possible. The immensity of my stock and my moderate expenses places me in a position to defy competition.

In examining the within Catalogue do not forget my other of February, 1879, as that contains a more extended description of many different patterns of Mirrors, Mouldings, etc., than this one.

Boxing and Cartage will be charged at a reasonable price.

AKAM'S PARLOR, BILLIARD AND DINING TABLE.

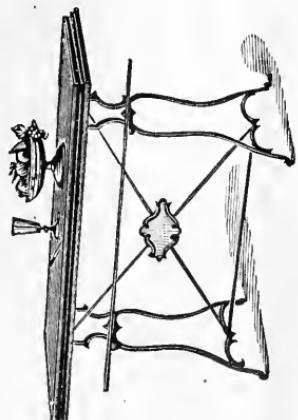

PATENTED JANUARY 7, 1879.

“A.”

“B.”

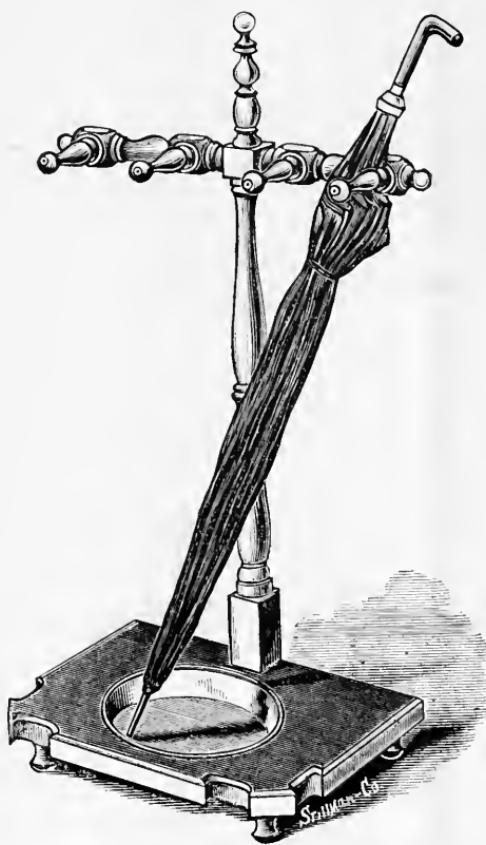

“C.”

Cut “A” represents the Billiard Table when in use, playing the game of billiards. Cut “B” represents it when made into a “Side-board” combination. Cut “C” represents it when made into a “Dining Table” combination. The rails are made of walnut, the cushions of rubber, the bed of slate or wood, as you may order, covered with wool cloth, the stand of iron, and the size of table about $2\frac{1}{2}$ by 5 feet. Can be used in a room 12x15 feet. I can furnish these tables with or without the Side-board or Dining Table combination.

*Price of Table, with beveled and flat top rail..... \$19.00
“ “ “ “ with fancy work..... 22.00*

The above prices are for the Table as shown in cut “A,” without the Side-board and Dining Table combination—but includes four Ivory Balls, Cues, Chalk, Level, and Pool Pins. I will supply the Side-board and Dining Table combination, made of walnut, for an additional price of **\$2.50**. I would suggest the propriety of ordering these Tables with wood beds when they are wished with Side-board combination, as with slate beds the weight is so much that they are not so easily handled, and are more apt to upset when used for a Side-board, on account of the weight of the slate. The wood beds are made from strips less than an inch wide, thoroughly seasoned and firmly glued, and with cross-bars underneath, making it firm and substantial. The thickness of the wood bed is about $1\frac{1}{2}$ inches.

The Economical Hat and Coat Rack.

THEY ARE ECONOMICAL, first as to cost. They are economical as to space,—being made to screw fast to a wall, window frame or door-case,—and can, when out of use, be folded up against the wall so as to be entirely out of the way. When folded up it occupies about $3\frac{1}{3}$ cubic feet. They are economical as to utility, combining in a most beautiful manner a separate hat and coat rack,—the upper portion being used exclusively for hats, and the lower for coats,—and capable of holding 16 coats: not spread all over a wall, but contained in a very small circle. They are economical as to durability, being made entirely of iron, excepting the mirror. They will stand the wear and tear for years, and answer the purposes of a hall rack.

The large number of voluntary orders that I have received, and the ratio in which they have increased, makes it seem unnecessary for me to solicit your orders through travelling help—and for the present I shall only solicit trade in that manner in a limited way, and thereby save largely the expenses otherwise incurred by that method. The advantages derived from this course will help me to make prices so as to defy any legitimate competition on **Top of Earth.**

P. S. Please do not delay your orders, but send them as early as possible, that you may receive the goods in time for your trade.
